

## **PSIG 2013 Talk – Technical Talk by SLNG**

The presentation will provide an overview of the LNG industry from gas production to its conversion to LNG at the liquefaction plants, storage and loading of LNG in to LNG carriers, LNG shipping carriers, unloading and storage of LNG at vaporisation terminals such as the one at Singapore and LNG pressurisation and vaporisation for export via gas pipelines infrastructure to the end consumers. The presentation will also look at LNG storage tanks design and construction and in brief consider other major equipment installed at the vaporisation terminals.

The presentation will also include a brief overview of the natural gas and LNG as sources of clean and green energy.

The presentation will be delivered by Mr Dilip Patel of Singapore LNG Corporation Pte Ltd (SLNG), which is as a commercial business funded by the government of Singapore via the Energy Market Authority (EMA) to provide diversity and security of gas supply to power plants and other industries in Singapore. See attached for the detail of Mr Dilip Patel's carrer Synopsis.
